

Automated Meter Reader (AMR) Request Form

To meet current legislation and comply with the Government's future Smart and Advanced Metering requirements, we will be rolling out Automated Meter Reading (AMR) devices to all our customers. This will enable us to read your gas meters remotely and use the readings to accurately calculate future billing invoices. AMRs greatly reduce the need to issue estimated bills. You can also monitor your consumption online.

In order for us to install an AMR device we require at least one site contact. This can be done by completing the form below. Please let us know if there are any special access instructions.

We will pass on your details to our Metering Partner who will arrange a convenient time and date to undertake the work with the site contact. If this involves exchanging your existing meter for a new meter the gas supply will need to be disconnected for a short period, however we will do our utmost to cause as little disruption as possible.

If you have any questions or concerns over the process involved, please call us on 0161 762 7744 or email your query to spa@crowngas.co.uk and we will be happy to assist. Upon completion please return this form to us at spa@crowngas.co.uk.
