

Environmental Policy

Crown Gas & Power is committed to tackling the environmental impacts of its own operations, whilst inspiring our customers, suppliers, and community to do the same through simple information, practical solutions, and a drive for continuous improvement.

To support our commitment, we will:

- Seek to invest in technologies to reduce energy consumption across our office(s).
- Seek to invest in renewable energy solutions to heat and power our office(s).
- Establish an internal steering group to focus on environmental and sustainability aspects and impacts relevant to our operational scope.
- Regularly monitor performance indicators relating to the environmental impact of our own operations, including energy consumption, waste generation and carbon emissions.
- Communicate transparently with interested stakeholders regarding progress in relation to our environmental efforts.
- Support and incentivise our employees to consider the environmental impacts of their actions and behaviors and empower them to make environmentally conscious choices.
- Cultivate an environment that makes choosing eco-friendly option the default option where possible
- Work to promote appropriate consideration of the environmental aspects of products and services purchased by our customers.
- Continue to actively engage with Ofgem and the Secretary of State to protect the interests of existing and future consumers.

The appropriateness and effectiveness of this policy is monitored and reviewed on an ongoing basis.
